Dance Mat Typing Home Tracking Sheet

For each stage, write the date that your child practices that stage. S/he may want to practice a stage more than once before going on to the next stage. We especially recommend that students **practice Stage 1 two or three times** before going on to subsequent stages. If a stage cannot be completed in one sitting in a reasonable amount of time (20-30 minutes), that stage should be repeated. Assure your child that the next time through that stage, it will be easier!
